

Fax documents to multiple destinations online from the convenience of your desktop.

Bottomline Fax™ 4.1

Comprehensive Online Fax Management and Distribution

Solution Benefits

- Automates enterprise-wide, high-volume faxing, which supports your company's unique requirements for document distribution
- Increases efficiencies throughout the enterprise by streamlining document and report faxing processes
- Reduces fax equipment and supply costs, as well as telecommunication fees by automating fax processes
- Sends, receives and routes faxes quickly and easily via a customizable graphical user interface (GUI)
- Provides built-in fax communication management, measuring and reporting tools for greater visibility and control of enterprise-wide fax distribution
- Standardizes fax communications for all server environments throughout the enterprise

What's New

Bottomline Fax supports the following Microsoft® Windows platforms:

- Microsoft Windows 7
- Microsoft Windows 2003 Server
- Microsoft Windows 2008 Server
- Microsoft Windows 2008 Server R2

Bottomline Fax is a comprehensive facsimile (fax) transmission and reception solution designed to automate enterprise-wide, high production faxing. Bottomline Fax allows users the ability to automatically send, receive, print, view and route documents to multiple fax destinations.

Bottomline Fax reduces fax delivery costs and increases efficiencies by accelerating high-volume fax processes and eliminating hard copy output for documents sent to your customers, business partners or suppliers via industry standard fax technology.

An add-on component which integrates with Transform® and Optio® data processing solutions, Bottomline Fax enables customers to:

- Quickly and easily customize documents for multiple business processes and destinations
- Optimize document-intensive processes without the need for ERP modifications
- Develop unique process workflows that can be reused
- Create customized invoices and other business forms that satisfy all client requirements
- Dynamically distribute documents via multiple output channels, such as printer, e-mail, XML file or web

Also Bottomline Fax seamlessly integrates with any enterprise application through its powerful application program interfaces (API's), enabling integrators and application developers to fax-enable any application, quickly and easily, without custom programming.

Key Features

- **Quick fax** – enables users to deliver a cover sheet with a customizable date and time stamp with any fax distribution
- **Multiple attachments** – allows users to attach an unlimited number of documents to any fax project
- **Modify and check fax status** – enables users to check on the status of sent faxes based on several criteria and modify fax parameters, such as incorrect phone numbers
- **Fax notification by email** – automatically notifies users of incoming and outgoing fax delivery (enables simultaneous delivery to multiple email addresses)
- **Comprehensive fax management** – enables the configuration of multiple fax systems in geographically-dispersed locations from a single desktop; monitoring tools allow administrators to track and control faxing queues and identify fax origination
- **Robust reporting tools** – provides administrative and user reporting of all information in the fax system, including inbound/outbound status reports, phone book directories, system usage and statistics
- **Phone book support** – supports distribution to local (hosted) and client-based phone books. Hosted phone book access can be controlled through built-in security rules, according to customer requirements
- **Enhanced record-keeping capabilities** – reports inbound and outbound faxes for departmental records based on data, phone number and various other criteria for audit and charge-back purposes
