

QuickRecord® Suite

Consolidate and Distribute Patient Information

QuickRecord Benefits:

QuickRecord enables your healthcare facility to:

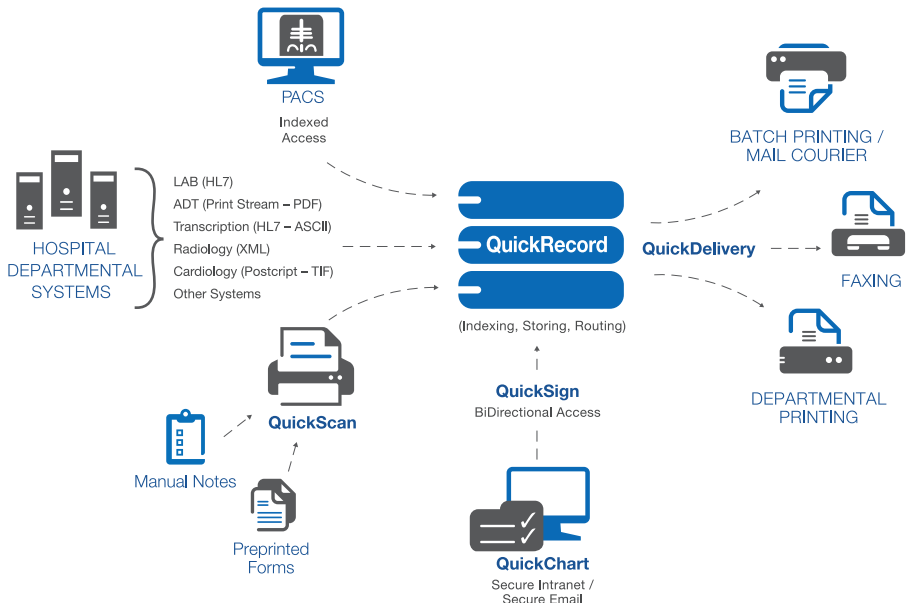

- Reduce the cost of delivering care by providing physicians with access to a more complete patient record, eliminating duplicate or unnecessary treatments
- Improve the quality of care decisions by consolidating scanned paper documents and discrete data from disparate applications into a composite view of patient information accessible via a single sign-on
- Speed treatment and discharge by delivering immediate access to critical information such as lab and radiology results when and where it's needed — in the hospital, outpatient facility, or in physician's office or home
- Expedite chart throughput, billing and payment by efficiently eliminating chart deficiencies and enabling physicians' electronic signature authentication

Bottomline Technologies' QuickRecord solution solves the problem of needing a simplified, consolidated view of patient health information. This includes printed or handwritten scanned documents and discrete data from multiple hospital information systems such as registration, patient care, lab, radiology, pharmacy and other areas.

QuickRecord brings these inefficient islands of information together into a composite electronic view of patient information that is accessible whenever and wherever it is needed. Physicians have secure Web access to their patients' electronic records inside the healthcare facility, in their offices or at home. As a result, quality of care improves, the chance for medical errors decreases, and efficiency increases by eliminating redundant, unreimbursed treatments.

QuickRecord also serves as a centralized distribution point for documents via print, fax and email. Physician-specific document delivery rules can be defined. The solution also includes an e-signature module that enables physicians to sign-off on time and care-sensitive documents as part of the deficiency management process.

QuickRecord At-a-Glance

Powerful, Affordable Software Solution Delivered as a Managed Service

QuickRecord follows a non-invasive integration approach with your existing ADT, transcription, lab, radiology, cardiology, PACS and imaging systems. The monthly subscription approach allows your facility to cost-effectively implement aggregation and delivery of health information – without a large, upfront capital investment. Bottomline also remotely installs, proactively monitors, and maintains QuickRecord which reduces your burden.

Solution Family

QuickChart®

Provide physicians and caregivers with secure access to patient information, including discrete data, images, reports, graphs and trending, and patient documents.

QuickDelivery™

Improve efficiency and minimize manual processing errors by automating the delivery of critical documents to the point of need.

QuickScan™

Drive supporting documents instantly into the electronic patient record through desktop imaging and scanning.

QuickRecord Deficiency Management™

Reconcile deficient charts by tracking the status of each chart and sending electronic delinquency alerts to analysts, coders, transcriptionists and physicians based on predefined, role- and location-based rules. Reporting functionality also allows users to monitor quality assurance and examine analyst efficiency.

QuickSign™

Increase chart throughput and billing processes by enabling physicians to digitally authenticate documents.

“It has simplified my life tremendously. I never realized how much it would help me organize my day. It allows me to not only review the records, but to compare prior lab results, previous hospital stays, etc.”

— Edward Miner, M.D.,
Lourdes Network Physician

Related Products

Logical Ink®

Mobilize the capture and presentation of discrete patient data, clinical and business information, and signatures required for consent with an innovative e-paper solution. Logical Ink, an intelligent, truly paperless solution, presents interactive forms via mobile tablets. With active validation at the point of care, Logical Ink improves the patient experience while delivering accurate and timely data to downstream clinical and financial systems.

MedEx®

Access and produce standardized forms, bar-coded patient wristbands and labels that include up-to-date patient demographic information.

Why Bottomline?

For more than 20 years, Bottomline has been focused on software applications that optimize document-driven processes. As a result, Bottomline possesses both the proven solutions and the tested domain expertise to deliver consistent customer value and significant return on investment.

As a leader in document processing automation, Bottomline's solutions for document and payment automation have been successfully installed in more than 10,000 organizations around the globe.
