

## What's New: C-Series® 3.7

Expanded Capabilities for Document Processing, Data Integration, Administration Auditing, Reporting and More

### What's New?

#### Transform 5.2

- New streamlined PDF element to increase processing efficiency
- Standard payroll and accounts payable check layout optimizations that utilize the Transform 5.2 elements and the addition of new standard 1099 Layout

#### Standard Data Integrations

- Payee address book lookup configuration
- Improved dynamic effective date calculation for ACH payments

#### Non-MICR Document Processing

- Non-MICR document processing allows for an extension of the current platform to account for payment related documents such as 1099s and W2s
- Allows for a wide range of functionality including but not limited to eSend, PDF creation and printing

#### Specific Standard Auditing and Reporting Capabilities

- Enhanced administration auditing for the Payee address book
- Standard batch summary report to include new information

#### ACH Pre-Note

- Support for pre-note only batches

#### Offset Support

- Configuration of offset bank information for offset batch or offset transaction

### Why Bottomline?

Bottomline Technologies is confident that C-Series will deliver value to today's fast-paced, global businesses by streamlining payment and cash reporting processes through a single platform and driving down the total cost of ownership. Providing payments and cash management solutions for more than 20 years, our deep intellectual capital ensures that we can support our customers' growth initiatives and provide a solution that will continue to keep pace with market, regulatory and internal best practices.
